The primary sense is *advancing*, from the same root as L. *gradior*; W. *rhaz*, [rhath;] Syr. ; *radah*, to go.]

See CALL, HEAL, and WHOLE.]

1. Every one, or the whole number of particulars

2. The whole quantity, extent, duration, amount, quality, or degree; as, *all* the wheat; *all* the land; *all* the year; *all* the strength. In the sense of *although*, as, "*all* were it as the rest," and in the sense of *just*, or *at the moment*, as, "*all* as his straying flock he fed," it is obsolete, or restricted to poetry.

It is all one, is a phrase equivalent to *the same thing in effect*; that is, it is *wholly* the same thing.

AL'LĒ-GO-RY, *n.* [Gr. αλληγορια, of αλλος, other, and αγορευω, to speak, from αγορα, a forum, an oration.]

A figurative sentence or discourse, in which the principal subject is described by another subject resembling it in its properties and circumstances. The principal subject is thus kept out of view, and we are left to collect the intentions of the writer or speaker, by the resemblance of the secondary to the primary subject. Allegory is in words what hieroglyphics are in painting. We have a fine example of an allegory in the eightieth Psalm, in which God's chosen people are represented by a vineyard. The distinction in Scripture between a parable and an allegory, is said to be, that a parable is a *supposed* history, and an allegory, a figurative description of *real* facts. An allegory is called a continued metaphor. The following line in Virgil is an example of an allegory.

Claudite jam rivos, pueri; sat prata biberunt.

"Stop the currents, young men; the meadows have drank sufficiently;" that is, Let your music cease, our ears have been sufficiently delighted. *Encyc.*

AL-LE-MAN'NIĆ, *a.* Belonging to the *Alemanni*, ancient Germans, and to *Alemannia*, their country. The word is generally supposed to be composed of *all* and *manni*, all men. *Cluver*, p. 68. This is probably an error. The word is more probably composed of the Celtic *all*, other, the root of Latin *alius*, and *man*, place; one of another place, a stranger. The Welsh *allman* is thus rendered, and this seems to be the original word. *Owen, Welsh Dict.*

The name *Alemanni* seems to have been first given to the Germans who invaded Gaul in the reign of Augustus. *Cluver, Germ. Antiq.*

Alligation is of two kinds, *medial* and *alternate*; *medial*, when the rate of a mixture is sought from the rates and quantities of the simples; *alternate*, when the quantities of the simples are sought from the rates of the simples, and the rate of the mixture.

AL'LI-GĀ-TOR, *n.** [properly *allagarto*, from the Spanish and Portuguese *lagarto*, a lizard; L. *lacerta*. The Latin word seems to be connected with *lacertus*, the arm; and the animal may be named from the resemblance of his legs to arms.]

The mouth is very large, and furnished with sharp teeth; the skin is brown, tough, and, on the sides, covered with tubercles. The largest of these animals grow to the length of seventeen or eighteen feet. They live in and about the rivers in warm climates, eat fish, and sometimes catch hogs on the shore, or dogs which are swimming. According to Pontoppidan, it is composed of *all* and *odh*, all-property, or whole estate. In Sw. *odal*, and in Dan. *odel*, signify *allodial*; the word being used as an adjective; Sw. *odalgods*, that is, *odal goods*, signifies allodial lands; and *odaljord*, odal earth, is used as its synonym. *Odalman* is one who possesses allodial land; *odalbonde* is a yeoman or freeholder; *odelt* signifies undivided; *o*, in Swedish, being a prefix, answering to the English *un*, and giving to words a negative signification. If *o* in *odal* is this prefix, and *dal* from the root of *deal*, the word signifies *undivided*. But some obscurity rests on this word. Pontoppidan's derivation is most probably the true one.]

It signifies, also, in Ch., a tumor, a pustule, a mountain, the sense of which is a lump or mass collected; and this may be the sense of *amber*. In German, Dutch, Swedish, and Danish, it has a name corresponding to the English *burnstone*.]

A hard, semi-pellucid substance, tasteless and without smell, except when pounded or heated, when it emits a fragrant odor. It is found in alluvial soils, or on the sea-shore, in many places; particularly on the shores of the Baltic, in Europe, and at Cape Sable, in Maryland, in the United States. It does not effervesce with acids; it melts easily into a kind of yellow resin, and is soluble, but not readily, in spirit of wine. Various opinions have been entertained respecting its origin; but it is well ascertained that it is a morbid secretion into the intestines of the spermaceti whale, a species of Physeter. It has been found in that species of whale, but usually is found floating on the surface of the ocean, in regions frequented by whales; sometimes in masses of from 60 to 225 lbs. weight. In this substance are found the beaks of the cuttle-fish, on which that whale is known to feed. It is highly valued as a material in perfumery. *Encyc.*

AM-PHIB'I-AL, *n.* } AM-PHIB'I-AN, *n.* } AM-PHIB'I-A, *n. pl.* } [Gr. αμφι, both or about, and βιος, life.]

In *zoology*, the Amphibia are a class of animals, so formed as to live on land, and for a long time under water. Their heart has but one ventricle; their blood is red and cold; and they have such command of the lungs, as for a considerable time to suspend respiration. This class of animals is divided into two orders, the Reptiles and the Serpents. To the first belong the Testudo or tortoise, the Draco or dragon, the Lacerta or lizard, and the Rana or frog; to the second, the Crotalus, Boa, Coluber, Anguis, Amphisbæna, and Cæcilia. *Linn.*

The term has also been applied by Cuvier to designate a family of marine quadrupeds, including the seal and walrus. *Encyc.*

This term is strictly applicable only to such animals as possess both lungs and gills, as the siren, or other equivalent organs, as some of the lower animals. Less strictly, it may be applied to such animals as breathe by gills at one period of their existence, and by lungs at another, as the frog. *P. Cyc.*

AM-PHI-BOL'O-GY, *n.* [Gr. *αμφι*, *βαλλω*, and *λογος*, speech; *αμφιβολογια*.] A phrase or discourse, susceptible of two interpretations; and hence, a phrase or discourse of uncertain meaning. Amphibology arises from the order of the phrase, rather than from the ambiguous meaning of a word, which is called *equivocation*. We have an example in the answer of the oracle to Pyrrhus: "Aio te Romanos vincere posse." Here *te* and *Romanos* may either of them precede or follow *vincere posse*, and the sense may be either, *you* may conquer the *Romans*, or the *Romans* may conquer *you*. > *Pope. Trumbull.*

AM'PHI-CO-ME, *n.* [Gr. *αμφι* and *κομη*, hair.] A kind of figured stone, of a round shape, but rugged and beset with eminences; called also *Erotylos*, on account of its supposed power of exciting love. Anciently, it was used in divination; but it is little known to the moderns. *Encyc.*

AM-PHIC'TY-ONS, *n. pl.* In *Grecian history*, an assembly or council of deputies from the different states of Greece, supposed to be so called from Amphictyon, the son of Deucalion; but this opinion is probably a fable. Ten or twelve states were represented in this assembly, which sat alternately at Thermopylæ and at Delphi. Each city sent two deputies, one called *Hieromnemon* and the other *Pylagoras*. The former inspected the sacrifices and ceremonies of religion; the latter had the charge of deciding causes and differences between private persons. The former was elected by lot; the latter by a plurality of voices. They had an equal right to deliberate and vote in all matters relating to the common interests of Greece. *Paus. Plin. Strabo. The body is cylindrical, and divided into numerous annular segments; the tail obtuse, and scarcely to be distinguished from the head, whence the belief that it moved equally well with either end foremost. There are two species; the *fuliginosa*, black with white spots, found in Africa and America and the *alba*, or white species, found in both the Indies, and generally in ant-hillocks. They feed on ants and earth-worms, and were formerly deemed poisonous; but this opinion is exploded. *Encyc. Cyc.*

The aquatic amphisbæna, *Gordius aquaticus*, Linn., is an animal resembling a horse-hair, found in water, and moving with either end foremost. The vulgar opinion that this is an animated horse-hair is found to be an error. This hair-worm is generated in the common black beetle, in which the parent worm lays its eggs; and is sometimes found in the earth and on the leaves of trees. *Lister, Phil. Trans. No.* 83.

AN, *a.* [Sax. *an, ane*, one; D. *een*; Ger. *ein*; Sw. and Dan. *en*; Fr. *on, un, une*; Sp. *un, uno*; It. *uno, una*; L. *unus, una, unum*; Gr. εν; Ir. *ein, ean, aon*; W. *un, yn*; Corn. *unyn*; Arm. *yunan.*]

One; noting an individual, either definitely, known, certain, specified, or understood; or indefinitely, not certain, known, or specified. Definitely; as, "Noah built *an* ark of Gopher wood:" "Paul was *an* eminent apostle." Indefinitely; as, "Bring me *an* orange" Before a consonant the letter *n* is dropped; as, *a* man; but our ancestors wrote *an* man, *an* king. This letter represents *an* definitely, or indefinitely. Definitely; as, "I will take you to me for *a* people, and I will be to you *a* God." Ex. vi. Indefinitely; as, "The province of *a* judge is to decide controversies." *An*, being the same word as *one*, should not be used with it; "such *an one*," is tautology; the true phrase is *such one.* Although *an, a*, and *one*, are the same word, and always have the same sense, yet by custom, *an* and *a* are used exclusively as a definitive adjective, and *one* is used in numbering. Where our ancestors wrote *an, twa, thry*, we now use *one, two, three.* So *an* and *a* are never used except with a noun; but *one*, like other adjectives, is sometimes used without its noun, and as a substitute for it: "*One* is at a loss to assign a reason for such conduct."

An is to be used before a vowel and before a silent *h*; as, *an hour.* It is also used before *h* when the accent of the word falls on any syllable except the first, as in *historian*, and *historiographer.*

AN, in old English authors, signifies *if*; as, "*An* it please your honor." So in Gr. αν or εαν, Ar. إِنْ

Sam. and L. *an*, if or whether; Ir. *an*, Ch. אן or איך if, whether. It is probably an imperative, like *if, gif, give.* Qu. Sax. *annan*, or *anan*, to give.

Ā'NA, *āā*, or *ā.* [Gr. ανα.]

In *medical prescriptions*, it denotes an equal quantity of the several ingredients; as, wine and honey, *ana, āā* or *ā* oz. ii., that is, of wine and honey each two ounces.

Ā'NA, as a termination, denotes a collection of memorable sayings. Thus, *Scaligerana* is a book containing the sayings of Scaliger. Similar collections existed among the ancients, as the *Dicta Collectanea*, or sayings, of Julius Cesar.

AN-A-LOG'IC-AL, *a.* Having analogy; used by way of analogy; bearing some relation. Thus *analogical* reasoning is reasoning from some similitude which things known bear to things unknown. An *analogical*

word is one which carries with it some relation to the original idea. Learning *enlightens* the mind, because it is to the mind what *light* is to the eye, enabling it to discover things before hidden. When both the things which have an analogy follow a preposition, that preposition must be *between* or *betwixt*; as, there is an analogy *between* plants and animals, or *between* customs. When one of the things precedes a verb, and the other follows, the preposition used must be *to* or *with*; as, a plant has some analogy *to* or *with* an animal.

2. With *grammarians*, analogy is a conformity of words to the genius, structure, or general rules of a language. Thus the general rule in English is, that the plural of a noun ends in *es*; therefore all nouns which have that plural termination have an *analogy*, or are formed in *analogy* with other words of a like kind. *Johnson. *1. An iron instrument for holding a ship or other vessel at rest in water. It is a strong shank, with a ring at one end, to which a cable may be fastened; and with two arms and flukes at the other end, forming a suitable angle with the shank to enter the ground.

In *seamen's language*, the *anchor comes home*, when it is dislodged from its bed, so as to drag by the violence of the wind, sea, or current.

Foul anchor, is when the anchor hooks or is entangled with another anchor, or with a wreck or cable, or when the slack cable is entangled.

The anchor *a cock bill*, is when it is suspended perpendicularly from the cat-head, ready to be let go.

The anchor *a peak*, is when it is drawn in so tight as to bring the ship directly over it.

The anchor is *a trip*, or *a weigh*, when it is just drawn out of the ground, in a perpendicular direction, either by the cable or the buoy-rope.

ĀN'CIENT, *a.* [Fr. *ancien*; It. *anziano, anzi*; from L. *ante, antiquus.*]

1. Old; that happened or existed in former times, usually, at a great distance of time; as, *ancient* authors, *ancient* days. *Old*, says Johnson, relates to the duration of the thing itself; as, an *old* coat; and *ancient*, to time in general; as, an *ancient* dress. But this distinction is not always observed. We say, in *old* times, as well as *ancient* times; *old* customs, &c. We usually apply both *ancient* and *old* to things subject to gradual decay. We say, an *old* man, an *ancient* record; but never, the *old* sun, *old* stars, an *old* river or mountain. In general, however, *ancient* is opposed to *modern*, and *old* to *new*, *fresh*, or *recent.* When we speak of a thing that existed formerly, which has ceased to exist, we commonly use *ancient*; as, *ancient* republics, *ancient* heroes; and not, *old* republics, *old* heroes. But when the thing which began or existed in former times, is still in existence, we use either *ancient* or *old*; as, *ancient* statues or paintings, or *old* statues or paintings; *ancient* authors, or *old* authors, meaning books. But, in these examples, *ancient* seems the most correct, or best authorized. Some persons apply *ancient* to men advanced in years, still living; but this use is not common in modern practice.

2. Old; that has been of long duration; as, an *ancient* forest; an *ancient* city.

3. Known from *ancient* times; as, the *ancient* continent, opposed to the *new* continent. *Robertson.*

God is called "the *Ancient* of days," from his eternal existence. Dan. vii.

Hooker uses the word for *seniors*; "they were his *ancients*;" but the use is not authorized.

2. *Ancient* is also used for a flag or streamer, in a ship of war, or the colors of a regiment; and for an ensign or the bearer of a flag, as in Shakspeare. Cowel supposes the word, when used for a flag, to be a corruption of *end-sheet*, a flag at the stern. It is probably the Fr. *enseigne.* *Johnson. Cowel. Encyc.*

An organized body, endowed with life, sensation, and the power of voluntary motion; a living, sensitive, locomotive body; as, man is an intelligent *animal.* Animals are essentially distinguished from plants by the property of *sensation.* The contractile property of some plants, as the Mimosa, has the appearance of the effect of *sensation*, but it may be merely the effect of *irritability.*

At the center of the flower is the mouth of the animal, and around it there are one or more circles of slender appendages, called *tentacles*, corresponding in position to the petals of the Aster. The colors of these animal flowers are often of singular beauty. They are also called *polyps*, and are identical in structure with a large part of coral animals.

The other marine animals, to which the term *animal-flower* is also extended, belong to the Holothurias, which, with the Actinias, were ranged under the Mollusca, by Linnæus; and to the Tubularias, Sertularias, Hydras, and Alegonia, which were classed with the zoophytes. The real truth is not ascertained.]

Primarily, a metallic ore consisting of sulphur combined with a metal; the sulphuret of antimony, the *stibium* of the Romans, and the *στιμμι* of the Greeks. It is a blackish mineral, which stains the hands, hard, brittle, full of long, shining, needle-like striæ. It is found in the mines of Bohemia and Hungary, in France and England, and in America. This word is also used for the pure metal or *regulus of antimony*, a metal of a grayish or silvery white, very brittle, and of a plated or scaly texture, and of moderate specific gravity. By exposure to air, its surface becomes tarnished, but does not rust. It is used as an ingredient in concave mirrors, giving them a finer texture. In bells, it renders the sound more clear; it renders tin more hard, white, and sonorous, and gives to printing types more firmness and smoothness. It is also useful in promoting the fusion of metals, and especially in casting cannon balls. In its crude state, it is harmless to the human constitution; but many of its preparations act violently as emetics and cathartics. *Chambers. Encyc. Nicholson.*

AN-TIP'A-THY, *n.*† [Gr. *αντι*, against, and *παθος*, feeling.]

Natural aversion; instinctive contrariety or opposition in feeling; an aversion felt at the presence, real or ideal, of a particular object. This word literally denotes a *natural* aversion, which may be of different degrees, and in some cases may excite terror or horror at the presence of an object. Such is the aversion of animals for their natural enemies, as the *antipathy* of a mouse to a cat or a weasel. Sometimes persons have an insuperable constitutional *antipathy* to certain kinds of food.

The word is applied, also, to aversion contracted by experience or habit; as when a person has suffered an injury from some food, or from an animal, which before was not an object of hatred, or when a particular kind of food or medicine is taken into a sickly stomach, and which nauseates it, the effect is *antipathy*, which is often of long continuance.

Antipathy, however, is often affected; as when persons pretend a great aversion to things from false delicacy.

2. In *ethics*, *antipathy* is hatred, aversion, or repugnancy; *hatred* to persons; *aversion* to persons or things; *repugnancy* to actions. Thus the paschal lamb, in Scripture, is the type, of which Christ is the *antitype*. An antitype, then, is something which is formed according to a model, or pattern, and bearing strong features of resemblance to it.

In *the Greek liturgy*, the sacramental bread and wine are called *antitypes*, that is, figures, similitudes; and the Greek fathers used the word in a like sense. *Encyc.*

The last syllable is from the verb *build*; in Germ. *bilden*, to form or shape, and *bild*, an image or form, which in Dutch is *beeld*. To build is to *shape*, to *form*, and *anvil*, that is, *on build*, is that *on* which things are *shaped*. The Latin word *incus*, *incudis*, is formed by a like analogy from *in* and *cudo*, to hammer, or shape; and the same ideas are connected in the Celtic; W. *eingion*; Ir. *inneon*, anvil, and *inneonam*, to strike.]

1. One, indefinitely.

Nor knoweth *any* man the Father, save the Son. — Matt. xi.

But in truth, *Aonia* itself is formed from the Celtic *aon*, a spring or fountain, [the fabled son of Neptune,] and this word gave name to *Aonia*. As the muses were fond of springs, the word was applied to the muses, and to mountains which were their favorite residence, as to Parnassus. *Milton.*

Thus, "All whom God absolves are free from sin; but God absolves all who are in Christ; therefore all who are in Christ are free from sin." The first proposition is evident; but the second may require further proof, as that God received full satisfaction for sin by the suffering of Christ.

A name given by the Spaniards to the different species of quadrupeds, belonging to the Linnæan genus Desypus; peculiar to South America, and called by the Portuguese *encubesto*, from their peculiar covering, and by the natives of Brazil *taton*. These animals have only molar teeth, and are covered with a hard, bony shell, divided into movable belts, except on the forehead, shoulders, and haunches, where it is not movable. The belts are connected by a membrane, which enables the animal to roll itself up like a hedgehog. These animals burrow in the earth, where they lie during the daytime, seldom going abroad except at night. They are of different sizes; the largest more than three feet in length, without the tail. They subsist chiefly on fruits, roots, and insects; sometimes on flesh. When attacked, they roll themselves into a ball, presenting their armor on all sides to any assailant; but they are inoffensive, and their flesh is esteemed good food. *Encyc.*

Each of these pieces was called the *armature* of its respective pole, and the two together the *armature* of the magnet. In order to preserve the power of a magnet so armed, and to combine the action of the two poles, the latter were connected by a piece of iron, which also served as an armature. The first three words, *demand*, *claim*, *require*, imply a right, or supposed right, in the person asking, to the thing requested; and *beg* and *beseech* imply more urgency than *ask*. *Ask* and *request* imply no right, but suppose the thing desired to be a favor. AS-PHALT′, } *n.* [G. ασφαλτος.]
AS-PHALT′UM, }

Bitumen Judaicum, Jew's pitch; a smooth, hard, brittle, black or brown substance, which breaks with a polish, melts easily when heated, and when pure, burns without leaving any ashes. It has little taste, and scarcely any smell, unless heated, when it emits a strong smell of pitch. It is found in a soft or liquid state on the surface of the Dead Sea, which, from this substance, is called *Asphaltites*, or the Asphaltic Lake. It is found also in the earth, in many parts of Asia, Europe, and America. Formerly, it was used for embalming dead bodies; the solid asphaltum is still employed in Arabia, Egypt, and Persia, instead of pitch, for ships; and the fluid asphaltum is used for varnishing, and for burning in lamps. It is also used for pavement in streets. A species found in Neufchatel is found excellent as a cement for walls and pavements; very durable in air, and not penetrable by water. A composition of asphaltum, lamp-black, and oil of spike, or turpentine, is used for drawing black figures on dial plates. *Nicholson.*

AT, *prep.* [Sax. *æt*; Goth. *at*; L. *ad.* *At*, *ad*, and *to*, if not radically the same word, often coincide in signification. In W. *at* is *to*, and in Danish and Swedish, it is the sign of the infinitive mode; in Amh. *od*, or *ad*, is toward. The word *at* is doubtless the Oriental אתא, אתה, Ch. and Heb. to come, to approach. Hence it primarily denotes *presence*, *meeting*, *nearness*, *direction toward.*]

In general, *at* denotes *nearness* or *presence*; as, *at* the ninth hour, *at* the house; but it is less definite than *in* or *on*; *at* the house, may be *in* or *near* the house. It denotes also *toward*, *versus*; as, to aim an arrow *at* a mark.

From this original import are derived all the various uses of *at.* *At* the sight, is *with*, *present*, or *coming* the sight; *at* this news, *present* the news, *on* or *with* the approach or arrival of this news. *At* peace, *at* war, in a state of peace or war, peace or war existing, being present; *at* ease, *at* play, *at* a loss, &c., convey the like idea. *At* arms, furnished with arms, bearing arms; *at* hand, within reach of the hand, and therefore *near*; *at* my cost, *with* my cost; *at* his suit, *by* or *with* his suit; *at* this declaration, he rose from his seat, that is, present, or coming this declaration; whence results the idea, *in consequence of it.* *At* his command, is either *under* his command, that is, literally, coming or being come his command, in the power of, or in consequence of it. He is good *at* engraving, *at* husbandry; that is, in performing that business. He deserves well *at* our hands, that is, from us. The peculiar phrases in which this word occurs, with appropriate significations, are numerous. *At* first, *at* last, *at* least, *at* best, *at* the worst, *at* the highest or lowest, are phrases in which some noun is implied; as, at the first time or beginning; at the last time, or point of time; at the least or best degree, &c.; all denoting an extreme point or superlative degree. *At all*, is in any manner or degree.

At is sometimes used for *to*, or *toward*, noting progression or direction; as, he aims *at* perfection; he makes or runs *at* him, or points *at* him. In this phrase, he longs to be *at* him, *at* has its general sense of *approaching*, or *present*, or *with*, in contest or attack.

Sp. *atacar.* It seems to be allied to *attack*, and the sense is, to put, throw, or fall on, hence, to seize, and stop, coinciding with the Eng. *take*; Sw. *taga*; Dan. *tage*; Sax. *tæccan*; Gr. δεχομαι; L. *tango*, for *tago*; Eng. *tack*; &c. Class Dg. See ATTACK and TACK.]

1. To take by legal authority; to arrest the person by writ, to answer for a debt or demand; applied to a taking of the person by a *civil* process; being never used for the arrest of a criminal. It is applied also to the taking of goods and real estate by an officer, by virtue of a writ or precept, to hold the same to satisfy a judgment to be rendered in the suit.

1. A taking of the person, goods, or estate, by a writ or precept in a civil action, to secure a debt or demand.

2. A writ directing the person or estate of a person to be taken, to secure his appearance before a court. In *England*, the first notice to appear in court is by *summons*; and if the defendant disobeys this monition, a writ of attachment issues, commanding the sheriff to *attach* him, by taking gage, or security in goods, which he forfeits by non-appearance, or by making him find safe pledges or sureties for his appearance. But in trespasses, an attachment is the first process. In *this country*, *attachment* is more generally the first process; and in some states, the writ of attachment issues at first against the property or person of the defendant. In *Connecticut*, this writ issues against the person, goods, or land, in the first instance, commanding to take the goods and estate of the defendant, if to be found; or otherwise, to take his body. In *England*, witnesses not appearing upon a summons, may be taken by *attach-*

ment; a process called with us a *capias.* Attachments also issue against persons for contempt of court. The *court of attachments,* in England, is held before the verderors of the forest, to *attach* and try offenders against vert and venison.

Foreign attachment, is the taking of the money or goods of a debtor in the hands of a third person; as when the debtor is not within the jurisdiction of the court, or has absconded. Any person who has goods or effects of a debtor, is considered in law as the agent, attorney, factor, or trustee of the debtor; and an attachment served on such person binds the property in his hands to respond the judgment against the debtor.

It seems to be allied to *attach;* but the latter verb agrees better with the Eth. ΠΘΦ *tok, took,* to press, whence ΛΥΘΦ *atook,* to press, to make close; and the Ch. תכ, to accuse, to unite. Class Dg.]

1. To assault; to fall upon with force; to assail, as with force and arms. It is the appropriate word for the commencing act of hostility between armies and navies.

AT-TAIN', *v. i.* [Fr. and Norm. *atteindre;* L. *attingo,* to reach, come to, or overtake; *ad* and *tango,* to touch, reach, or strike; that is, to thrust, urge, or push to. It has no connection with L. *attineo.* See Class Dg.]

1. To reach; to come to or arrive at, by motion, bodily exertion, or efforts toward a place or object.

If by any means they might *attain* to Phenice.—Acts xxvii.

2. To reach; to come to or arrive at, by an effort of mind.

Such knowledge is too wonderful for me; it is high; I can not *attain* to it.—Ps. cxxxix.

Regularly this verb should be always followed by *to;* the omission of *to,* and the use of the verb in a transitive sense, may have originated in mistake, from the opinion that the verb is from the L. *attineo,* and equivalent to *obtain.*

AT-TAIN', *v. t.*

1. To gain; to compass; to achieve or accomplish, that is, to reach by efforts; without *to* following.

Is he wise who hopes to *attain* the end without the means? *Tillotson.*

This use of the verb is now established; but in strictness *to* is here implied; *attain to* the end. The real sense, as in the intransitive use of the verb, is, to *reach* or *come to* the end or purpose in view. This word always implies *an effort toward* an object. Hence it is not synonymous with *obtain* and *procure,* which do not necessarily imply such effort. We *procure* or *obtain* a thing by *purchase* or *loan,* and we *obtain* by inheritance, but we do not *attain* it by such means. An inattention to this distinction has led good authors into great mistakes in the use of this word.

2. To reach or come to a place or object by progression or motion.

But ere such tidings shall his ears *attain.* *Hoole's Tasso.*
Canaan he now *attains.* *Milton.*

3. To reach in excellence or degree · to equal. *Bacon.*

AT TAIN-A-BIL'I-TY, *n.* Attainableness. *Coleridge.*

AT-TAIN'A-BLE, *a.* That may be attained; that may be reached by efforts of the mind or body; that may be compassed or accomplished by efforts directed to the object; as, perfection is not *attainable* in this life. From an inattention to the true sense of this word, as explained under ATTAIN, authors have very improperly used this word for *obtainable, procurable;* as in the following passages: "The kind and quality of food and liquor, the species of habitation, furniture and clothing, to which the common people of each country are habituated, must be *attainable* with ease and certainty." *Paley, Philos.* b. 6, chap. 11. "Gen. Howe would not permit the purchase of those articles [clothes and blankets] in Philadelphia, and they were not *attainable* in the country." *Marshall's Life of Washington,* 3, 427. Each of those words should be *obtainable.*

AT-TAIN'A-BLE-NESS, *n.* The quality of being attainable.

2. By *the common law,* an immediate and inseparable effect of a judgment of death or outlawry, for treason or felony; the consequences of which to the person attainted are forfeiture of lands, tenements, and hereditaments; corruption of blood, by which he can no longer inherit, or transmit an inheritance; and loss of reputation, and of civil rights generally. A statute of parliament attainting a criminal, is called an *act* or *bill of attainder.* By a statute of 3-4 Wm. IV., the consequences of attainder are limited to the life of the person attainted.

Upon the thorough demonstration of which guilt by legal *attainder,* the feudal covenant is broken. *Blackstone.*

3. The act of attainting.

An act was made for the *attainder* of several persons. *Encyc.*

Attraction is distinguished into that which is manifested between bodies or masses at sensible distances, and that which is manifested between the particles or molecules of bodies at insensible distances. The former includes the *attraction of gravity*, or *gravitation*, or the mutual tendency of all bodies to each other, as the tendency of the planets toward the sun, or of a stone, when raised in the air, to fall to the earth; and also, the *attraction of magnetism*, and *that of electricity*. The latter takes place either between particles of the same kind, or homogeneous particles, and is then called the *attraction of aggregation*, or *cohesion*; or between dissimilar or heterogeneous particles, uniting them into compounds, and is then called *chemical attraction*, or *affinity*. The attractions of the first class, however, exist between particles as well as masses; and the surfaces of masses in contact, or at inappreciable distances, also attract each other, causing *adhesion*, in heterogeneous as well as homogeneous bodies.

The *attraction of gravity* is supposed to be the great principle which confines the planets in their orbits. Its power or force is *directly* as the quantity of matter in a body, and *inversely* as the squares of the distances of the attracting bodies.

1. To take satisfaction for an injury by punishing the injuring party; to vindicate by inflicting pain or evil on the wrong-doer.

Shall not God *avenge* his own elect? — Luke xviii.
Avenge me of my adversary. — *Ib.* ver. 3.

In these examples, *avenge* implies that the evil inflicted on the injuring party is a satisfaction or justice done to the injured, and the party vindicated is the object of the verb.

2. To take satisfaction for, by pain or punishment inflicted on the injuring party.

He will *avenge* the blood of his servants. — Deut. xxxii.

Here, the thing for which satisfaction is taken is the object of the verb.

3. To revenge. To *avenge* and *revenge*, radically, are synonymous. But modern usage inclines to make a valuable distinction in the use of these words, restricting *avenge* to the taking of just punishment, and *revenge* to the infliction of pain or evil maliciously, in an illegal manner.

4. To punish; as, to *avenge* a crime. *Dryden.*

A-VER′, *v. t.*† [Fr. *averer*; It. *avverare*, to aver, or verify; Arm. *quirya*, from the root of *verus*, true; Ir. *feor* or *fir*; W. *gwir*; Corn. *uir*; Ger. *wahr*; D. *waar*. See VERIFY.]

1. To affirm with confidence; to declare in a positive or peremptory manner, as in confidence of asserting the truth. *Prior.*

2. In *law*, to offer to verify. [See AVERMENT.]

AV′ER-AGE, *n.* [Norm. *aver*, *avers*, cattle, money, goods, Sp. *averio*, from *aver* or *haber*, Fr. *avoir*, to *have* or possess. In *ancient law*, a duty or service which a tenant was bound to render to his lord, by his beasts and carriages or instruments of husbandry. *Spelman.* But *averagium* signifies also the loss of goods in transportation; Sp. *averia*, damage sustained by goods or ships; Port. *avaria*, an allowance out of freight to the master of a ship, for damage sustained; contribution by insurers, to make good a loss; It. *avaria*; Dan. *haverie*, damage of a ship or waste of goods, extraordinary charges during a voyage. If *avaria* signifies damage, and is from *aver* or *haber*, Spanish, to have, the sense of the word is probably that which happens or falls, a misfortune, for the verb *have* and *happen* are radically the same word; Spanish, *haber*, to have, and to happen or befall; also, fortune, property. This would give the sense of damage, or of proportion, lot, share, that which falls to each of a number. But the primary sense is not very obvious.]

1. In *commerce*, a contribution to a general loss. When, for the safety of a ship in distress, any destruction of property is incurred, either by cutting away the masts, throwing goods overboard, or other means, all persons who have goods on board, or property in the ship, contribute to the loss according to their average, that is, the goods of each on board. This principle, introduced into the commerce of Europe from the Rhodian laws, and recognized by the regulations of Wisby, is now an established rule in the maritime laws of Europe; for it is most reasonable that, when one man's property is sacrificed to save a ship, all persons whose property is saved, or in like hazard, should bear their proportion of the loss.

Park. Beawes. Spelman.

2. From the practice of contributing to bear losses in proportion to each man's property, this word has obtained the present popular sense, which is, that of a mean proportion, medial sum or quantity, made out of unequal sums or quantities. Thus, if A loses 5 dollars, B 9, and C 16, the sum is 30, and the average 10.

3. A small duty, payable, by the shippers of goods, to the master of the ship, over and above the freight, for his care of the goods. Hence the expression in bills of lading, "paying so much freight, with primage and *average* accustomed." *Cowel. Encyc.*

A turning from with disgust or dislike; aversion; hatred; disinclination. *South.*

It is nearly superseded by AVERSION.

A-VERSE′, (averss′) *a.*† [See AVERT.] The literal sense of this word is, *turned from*, in manifestation of dislike. Hence the real sense is,

1. Disliking; unwilling; having a repugnance of mind

Averse alike to flatter or offend. *Pope.*

2. Unfavorable; indisposed; malign.

And Pallas, now *averse*, refused her aid. *Dryden*

This word and its derivatives ought to be followed by *to*, and never by *from*. This word includes the idea of *from*: but the literal meaning being lost, the affection of the mind signified by the word, is exerted *toward* the object of dislike, and, like its kindred terms, *hatred*, *dislike*, *contrary*, *repugnant*, &c., should be followed by *to*. Indeed, it is absurd to speak of an affection of the mind exerted *from* an object.

Averse expresses a less degree of opposition in the mind than *detesting* and *abhorring*.

Milton twice uses *averse* in its literal sense of *turned away*, with *from*; but it is not according to the English idiom.

3. Turned backward; in a direction contrary to progression; as, tracks *averse* *Dryden.*

A-VERSE'LY, (a-vers'ly,) *adv.* With repugnance; unwillingly.

2. Backward; behind; as, an arm stretched *aversely*. *Davenant. Brown.*

1. Opposition or repugnance of mind; dislike; disinclination; reluctance; hatred. Usually this word expresses moderate hatred, or opposition of mind, not amounting to *abhorrence* or *detestation*. It ought generally to be followed by *to* before the object. [See AVERSE.] Sometimes it admits of *for*.

A freeholder is bred with an *aversion* to subjection. *Addison.*

2. Opposition or contrariety of nature: *applied to inanimate substances.*

Magnesia, notwithstanding this *aversion* to solution, forms a kind of paste with water. *Fourcroy, Trans.*

B.

B is the second letter, and the first articulation, or consonant, in the English, as in the Hebrew, Greek, Latin, and most other alphabets. In the Ethiopic, it is the ninth letter, and its shape is that of a hut. Perhaps from this or other like figure, it received its Hebrew name, *beth*, a house. It is a *mute* and a *labial*, being formed by pressing the whole length of the lips together, as in pronouncing *eb*. It is less perfectly mute than *p*, as may be perceived by pronouncing the syllables *ab* and *ap*. It is convertible, 1st, with *p*, as in the Celtic *ben* or *pen*, a mountain; in the English *beak* and *peak*, *beck* and *peck*; 2d, with *v*, as in the German *silber*, for *silver*; and in Spanish, *b* and *v* are often used indifferently; 3d, with *f*, as in English *bore*, and Latin *foro*; English *bear*, Latin *fero*; in the Celtic *bun*, *bunadh*, *bunait*, stock, origin, foundation; English *found*; Latin *fundamentum*; with the Greek *φ*, as *Bilip*, for Φιλιππος; 4th, with *v* and *w*; as, Irish *fior*, Latin *verus*; *fear*, *vir*; Irish *buiac*, the *wick* of a candle.

The Modern Greek B is always pronounced like the English V, and the Russian B corresponds with it.

In composition, the letter B is changed into *p* before the letter *p*; as in *opprimo*, from *ob* and *premo*; *oppono*, from *ob* and *pono*; into *f*, before *f*, as in *offero*, from *ob* and *fero*; into *c* before *c*, as in *occido*, from *ob* and *cado*, and *cædo*.

As a numeral, B was used by the Hebrews and Greeks, as now by the Arabians, for 2; by the Romans for 300, and with a dash over it, thus, B, for 3000. B is used also as an abbreviation; thus B. A. stand for *bachelor of arts*; B. L. for *bachelor of laws*; B. D. for *bachelor of divinity*; B. F., prefixed to the decrees of the old Romans, for *bonum factum*. In music, B stands for the tone above A; B♭, for B flat, or the semitone major above A. B. also stands for base, and B. C. for *basso continuo*, or thorough base.

The balsams are either liquid or solid; of the former are the balm of Gilead and the balsams of copaiva, Peru, and Tolu; of the latter, benzoin, dragon's blood, and storax. *Encyc. Nicholson. Ure.*

1. In *Great Britain,* a title or degree of nobility; a lord; a peer; one who holds the rank of nobility next below that of a viscount, and above that of a knight or baronet. Originally, the barons, being the feudatories of princes, were the proprietors of land held by honorable service. Hence, in ancient records, the word *barons* comprehends all the nobility. All such, in England, had, in early times, a right to sit in parliament. As a *baron* was the proprietor of a manor, and each manor had its *court-baron,* hence the *barons* claimed, and to this day enjoy, the right of judging in the last resort; a right pertaining to the house of lords, or peers, as the representatives of the ancient *barons, land-holders, manor-holders*

Anciently, *barons* were greater, or such as held their lands of the king *in capite;* or lesser, such as held their lands of the greater barons by military service *in capite.*

The title of *baron* is no longer attached to the possession of a manor, but given by the king's letters patent, or writ of summons to parliament; that is, the dignity is personal, not territorial.

A name common to a race of cheiropterous mammalia, forming the genus *Vespertilio*, of the order Primates, in Linnæus's system, but now considered as a family, in the order Cheiroptera, divided into several distinct genera. The fore feet have the toes connected by a membrane, expanded into a kind of wings, by means of which the animals fly. The species are numerous. Of these the vampire or Ternate bat inhabits Africa and the Oriental Isles. These animals fly in flocks from isle to isle, obscuring the air by their numbers. Their wings, when extended, measure five or six feet. They live on fruits, but are said sometimes to draw blood from persons when asleep. A state of expectation, watching or looking for; as, to keep a man *at bay.* So a stag *at bay*, is when he turns his head against the dogs. Whence *abeyance*, in law, or a state of expectancy.
[Since *to bay* means to bark as a dog, to keep at bay may refer to the repeated barking or baying of a dog when his prey ceases to fly, and faces him; as, when a stag turns upon the dogs, he keeps them at *bay*, or barking, because they dare not close in and attack him. Hence comes the meaning of the phrase, viz., "To ward off an attack; to keep an enemy from closing in." *Rich. Dict.*]

To the taste it is slightly bitterish and pungent; its odor is agreeable. It is used as a perfume and a medicine, being a weak deobstruent. *Encyc.*

BE, *v. i.*†*substantive verb*; *ppr.* BEING: *pp.* BEEN. [Sax. *beon*, to be. G. *bin*, *bist*; D. *ben*; Pers. بودن *bodan*, to be. San. *bhu*; and W. *bôd*, *byzu*, *bydiaw.* The sense is, to stand, remain, or be fixed; hence, to continue. This verb is defective, and its defects are supplied by verbs from other roots, *am*, *is*, *was*, *were*, which have no radical connection with *be.* The case is the same with the substantive verb in most languages.]
1. To be fixed; to exist; to have a real state or existence, for a longer or shorter time.

This verb is used as an auxiliary in forming the tenses of other verbs, and particularly in giving to them the passive form; as, he has *been* disturbed. It forms, with the infinitive, a particular future tense, which often expresses duty, necessity, or purpose; as, government *is to be* supported; we *are to pay* our just debts.
Let be, is to omit, or leave untouched; to let alone.

Let be, said he, my prey. *Dryden.*

BE, a prefix, as in *because*, *before*, *beset*, *bedeck*, is the same word as *by*; Sax. *be*, *big*; Goth. *bi.* It is common to the English, Saxon, Gothic, German, Dutch, Danish, and Swedish languages. It occurs probably in the Russian, but is written *po*, as it is in *possideo*, and a few other words in the Latin. It denotes nearness, closeness, about, on, at, from some root signifying to pass, or to press. [See BY.]
That this word is the Shemitic ב, used as a prefix, is certain, not only from its general applications, which may be seen by comparing the uses of the word, in the Hebrew, for instance, with those in the Saxon; but from its use in particular phrases, particularly in its use before the name of the Supreme Being, in swearing. Hence we find that ב is not from בה nor from בא, as Parkhurst supposes, but is an abbreviation of *big*, which is used in the Saxon, *big peli*, a proverb, a *by*-word; *bigstandan*, to stand *by.*

BEAŪ'TY, (bū'ty,) *n.* [Fr. *beauté*, from *beau.* See BEAU.]

1. An assemblage of graces, or an assemblage of properties in the form of the person or any other object which pleases the eye. In *the person*, due proportion or symmetry of parts constitutes the most essential property to which we annex the term *beauty*. In *the face*, the regularity and symmetry of the features, the color of the skin, the expression of the eye, are among the principal properties which constitute *beauty*. But as it is hardly possible to define all the properties which constitute beauty, we may observe in general, that *beauty* consists in whatever pleases the eye of the beholder, whether in the human body, in a tree, in a landscape, or in any other object.

Beauty is *intrinsic*, and perceived by the eye at first view, or *relative*, to perceive which, the aid of the understanding and reflection is requisite. Thus the *beauty* of a machine is not perceived till we understand its uses, and adaptation to its purpose. This is called *the beauty of utility.* By an easy transition, the word *beauty* is used to express what is pleasing to the other senses, or to the understanding. Thus we say, the *beauty* of a thought, of a remark, of sound, &c.

So *beauty*, armed with virtue, bows the soul
With a commanding, but a sweet control. *Percival.*

BEE, *n.* [Sax. *beo*; D. *bye*; G. *biene*; Sw. *bij*; Dan. *bie*; Ir. *beach*; It. *pecchia*; Sp. *abeja.* Class Bg.]

1. An insect of the genus Apis. [See APIS.] The species are numerous, of which the honey-bee is the most interesting to man. It has been cultivated from the earliest periods, for its wax and honey. It lives in swarms, or societies, of from 10,000 to 50,000 individuals. These swarms contain three classes of bees; the females or queen bees, of which there is only one in each swarm, the males or drones, and the neuters or working bees. Of the former, there is only one in each hive or swarm, whose sole office is to propagate the species. It is much larger than the other bees. The drones serve merely for impregnating the queen, after which they are destroyed by the neuters. These last are the laborers of the hive. They collect the honey, form the cells, and feed the other bees and the young. They are furnished with a proboscis, or tongue, by which they collect the honey from flowers, and a mouth, by which they swallow it, and then convey it to the hive in their stomachs, where they disgorge it into the cells. The pollen of flowers settles on the hairs with which their body is covered, whence it is collected into pellets by a brush on their second pair of legs, and deposited in a hollow in the third pair. It is called *bee-bread*, and is the food of the *larvæ* or young. The adult bees feed on honey. The wax was supposed to be formed from pollen by a digestive process, but it is now ascertained that it is formed from the honey by a similar process. The females and neuters have a barbed sting, attached to a bag of poison, which flows into the wound inflicted by the sting. When a hive is overstocked, a new colony is sent out under the direction of a queen bee. This is called *swarming.* *Cyc. Ed. Encyc.*

The modern phrase is, *to be*, or *to be put, upon one's good behavior.* Judges hold their office during *good behavior;* that is, during the integrity and fidelity of their official conduct.

Authors are divided in opinion as to the animal intended in Scripture by this name; some supposing it to be an ox, others, an elephant; and Bochart labors to prove it the hippopotamus, or river horse. It seems to unite some of the peculiar characteristics of all; and hence some consider it as a kind of type or representation of the largest land animals, under the general name of *behemoth*, which is a plural, denoting, literally, *beasts. Kitto.* The original word in Arabic signifies a brute or beast in general, especially a quadruped.

BE-HIND'HAND, *a.* [*behind* and *hand.*] In arrear; in an exhausted state; in a state in which rent or profit has been anticipated, and expenditures precede the receipt of funds to supply them. In *popular use*, a state of poverty, in which the means of living are not adequate to the end. Also, in a state of backwardness, in which a particular business has been delayed beyond the proper season for performing it; as, he is *behindhand* in his business.

Behindhand with, is *behind* in progress; not upon equal terms in forwardness; as, to be *behindhand with* the fashionable world.

This word is really an adjective, as it is applied to the *person* rather than to the *verb*; but like *adrift*, *aloft*, *ashamed*, and several other words, never precedes the noun. Shakspeare's "behindhand slackness," therefore, according to present usage, is not a legitimate phrase.

BE-HŌLD', *v. t.*; *pret.* and *pp.* BEHELD. [Sax. *behealdan*, *beheoldan*, *gehealdan*, *gehaldan*, from *healdan*, to hold. The sense is, to hold, to have in sight, from straining, restraining. In Saxon, the verb signifies not only to look or see, but to guard; so in Latin, *observo*, from *servo*, to keep. This explication leads us to an understanding of the participle *beholden*, which retains the primitive sense of the verb, *bound*, *obliged.* The Germans retain the original sense in *behalten*, to hold or keep; as the Dutch do in *gehouden*, held, bound; and the Danes in *beholde*, to keep, retain; *behold*, a retreat, refuge, reservation. See OBSERVE and REGARD.]

From these words, it appears that *belief* is from the root of *leave*, permission, assent; Sax. *leaf*, leave and *belief*; L. *fides*; *leofa*, permission, license; written, also, *lif* and *lufa*: *lufan*, to permit; D. *geloof*, G. *glaube*, belief, credit, faith; *gelooven*, *glauben*, to believe; Dan. *belove*, to promise; D. *oorlof*, *verlof*, leave, permission; G. *urlaub*, leave, *furlough.* The primary sense of *believe*, is to throw or put to, or to assent to; to leave with or to rest on; to rely. See Leave and Live.]

1. A persuasion of the truth, or an assent of mind to the truth of a declaration, proposition, or alleged fact, on the ground of evidence, distinct from personal knowledge; as, the *belief* of the gospel; *belief* of a witness. *Belief* may also be founded on internal impressions, or arguments and reasons furnished by our own minds; as, the *belief* of our senses; a train of reasoning may result in *belief.* *Belief* is opposed to *knowledge* and *science.*

2. In *theology*, faith, or a firm persuasion of the truths of religion.

No man can attain [to] *belief* by the bare contemplation of heaven and earth. *Hooker.*

4. In some cases, the word is used for persuasion or opinion, when the evidence is not so clear as to leave no doubt; but the shades of strength in opinion can hardly be defined, or exemplified. Hence the use of qualifying words; as, a *firm*, *full*, or *strong belief.*

BE-LIĒVE′, *v. t.* To credit upon the authority or testimony of another; to be persuaded of the truth of something upon the declaration of another, or upon evidence furnished by reasons, arguments, and deductions of the mind, or by other circumstances than personal knowledge. 2. To expect or hope with confidence; to trust.

I had fainted, unless I had *believed* to see the goodness of the Lord in the land of the living. — Ps. xxvii.

BE-LIĒVE′, *v. i.* To have a firm persuasion of any thing. In some cases, to have a full persuasion, approaching to certainty; in others, more doubt is implied. It is often followed by *in* or *on*, especially in the Scriptures. *To believe in*, is to hold as the object of faith. "Ye *believe in* God, *believe* also *in* me." John xiv. *To believe on*, is to trust, to place full confidence in, to rest upon with faith. "To them gave he power to become the sons of God, even to them that *believe on* his name." John i. *Johnson.* But there is no ground for much distinction.

In *theology*, to *believe* sometimes expresses a mere assent of the understanding to the truths of the gospel, as in the case of Simon. Acts viii. To others, the word implies, with this assent of the mind, a yielding of the will and affections, accompanied with a humble reliance on Christ for salvation. John i. 12. iii. 15.

In *popular use* and *familiar discourse*, to *believe* often expresses an opinion in a vague manner, without a very exact estimate of evidence, noting a mere preponderance of opinion, and is nearly equivalent to *think* or *suppose.*

BE-LIĒV′ER, *n.* One who believes; one who gives credit to other evidence than that of personal knowledge.

2. In *theology*, one who gives credit to the truth of the Scriptures, as a revelation from God. In a more restricted sense, a professor of Christianity; one who receives the gospel, as unfolding the true way of salvation, and Christ as his Savior.

In *the primitive church*, those who had been instructed in the truths of the gospel and baptized, were called *believers*: in distinction from the *catechumens*, who were under instruction, as preparatory to baptism and admission to church privileges. *Encyc.*

Its constituent parts are a barrel or hollow body, enlarged or expanded at one end, an ear or cannon by which it is hung to a beam, and a clapper on the inside. The blue tunic of the Jewish high priest was adorned with golden bells; and the kings of Persia are said to have the hem of their robe adorned with them in like manner. Among the Greeks, those who went the nightly rounds in camps or garrisons, used to ring a bell, at each sentinel-box, to see that the soldier on duty was awake. *Bells* were also put on the necks of criminals, to warn persons to move out of the way of so ill an omen as the sight of a criminal or his executioner; also, on the necks of beasts and birds, and in houses. From *trahir* is formed *trahissant*, and *trahison*, treason. If *traho* is the root, the sense is, to draw aside, to withdraw, or lead away; which would agree with the D. *bedriegen*, G. *betriegen*, Sw. *bedraga*, Dan. *bedrage*, to deceive; and *treachery*, Fr. *tricherie*, is from the root of *trick*. I do not find *betregan* in the Saxon, but *bedrog* is rendered *fefellit*, and this is from *dragan*, to draw. *Betray*, then, seems to be a compound of *be* and *dragan*, to draw; and *betrass* supra, may be from a different root. In strictness, to fail in duty; to be guilty of breach of trust; to violate the confidence reposed. BE-WAKE', *v. t.* [*be* and *wake.*] To keep awake. [*Not used.*] *Gower.*

BE-WARE', *v. i.* [Sax. *bewerian*, *bewarian*, *gewarian*, to guard, defend, restrain, prohibit, fortify, be cautious; Sw. *bevara*; D. *bewaaren*; Ger. *gewahr*, *bewahren*; Dan. *bevare*, to keep guard, preserve. See Ware, Wary.]

1. *Literally*, to restrain or guard one's self from. Hence, to regard with caution; to restrain one's self from any thing that may be dangerous, injurious, or improper; to avoid, to take care; followed by *of* before the thing that is to be avoided.

Beware of all, but most *beware of* man. *Pope.*
Beware of false prophets; *beware of* the leaven of the Pharisees; *beware of* the concision. *Scripture.*

2. To have a special regard to.

Behold, I send an angel before thee — *beware* of him, and obey his voice. — Ex. xxiii.

[*This is unusual, and hardly legitimate.*]

This word, though here admitted as a verb, from the Saxon, is rarely used as a verb in fact; or if a verb, is now never used except in the imperative mode. It is a compound of *be* and the Old Eng. *ware*, now *wary.* *Be wary* of danger. Hence, it can not be used with *did*, like a regular verb, nor with *be*, in any of its inflections, — he is *beware;* for this would be to use the substantive verb twice before *ware* and *wary*, *is* and *be.* Ben Jonson, however, has used the word in the third person. He *bewares* to act. But it has no past tense or participle, and therefore, if admitted as a verb, it is defective, and used only in the imperative mode, or after an auxiliary.

3. In the Greek, Latin, and some Protestant churches, a prelate, or person consecrated for the spiritual government and direction of a diocese. In *Great Britain*, bishops are nominated by the king, who, upon request of the dean and chapter for leave to elect a bishop, sends a *congé d'elire*, or license to elect, with a letter missive, nominating the person whom he would have chosen. The election, by the chapter, must be made within twelve days, or the king has a right to appoint whom he pleases. Bishops are consecrated by an archbishop, with two assistant bishops. A bishop must be thirty years of age; and all bishops, except the bishop of Man, are peers of the realm. *Blackstone.*

By the canons of the Protestant Episcopal church in the United States, no diocese or state shall proceed to the election of a bishop, unless there are at least six officiating presbyters residing therein, who shall be qualified, according to the canons, to vote for a bishop; a majority of whom, at least, must concur in the election. But the conventions of two or more dioceses, or states, having together nine or more such presbyters, may join in the election of a bishop. A convention is composed of the clergy, and a lay delegation, consisting of one or more members from each parish. In every state, the bishop is to be chosen according to such rules as the convention of that state shall ordain. The mode of election in most or all of the states, is by a concurrent vote of the clergy and laity, in convention, each body voting separately. Before a bishop can be consecrated, he must receive a testimonial of approbation from the general convention of the church; or, if that is not in session, from a majority of the standing committee in the several dioceses. The mode of consecrating bishops and ordaining priests and deacons, differs not essentially from the practice in England. *Bishop Brownell.*

But it is not clear that the noun ought not to be arranged before the verb.]

BOODH'ISM, *n.* A system of religion in Eastern Asia, embraced by more than one third of the human race. It teaches that, at distant intervals, a *Boodh*, or deity, appears, to restore the world from a state of ignorance and decay, and then sinks into a state of entire non-existence, or rather, perhaps, of bare existence without attributes, action, or consciousness. This state, called *Nirvana*, or *Nieban*, is regarded as the ultimate supreme good, and the highest reward of virtue among men. Four Boodhs have thus appeared in the world, and passed into *Nirvana*, the last of whom, Gaudama, became incarnate about 500 years before Christ. From his death, in 543 B. C., many thousand years will elapse before the appearance of another; so that the system, in the mean time, is practically one of pure atheism. The objects of worship, until another Boodh appears, are the relics and images of Gaudama. *E. E. Salisbury. Malcom.*

1. *To be born*, is to be produced or brought into life. "Man is *born* to trouble." A man *born* a prince or a beggar. It is followed by *of* before the mother or ancestors.

Hence *Perga* in Pamphylia, *Bergen* in Norway, *Burgos* in Spain, and probably *Prague* in Bohemia. In W. *bwr*, *bwrc*, signifies a wall, rampart, or work for defense, and *bwrdais* is a burgess. But the original sense probably is found in the verb Sax. *beorgan*, D. and G. *bergen*, Russ. *beregu*, to keep, or save, that is, to make close or secure. Hence it coincides with *park*, and L. *parcus*, saving. (See the next word.) If the noun is the primary word, denoting *hill*, this is from throwing together, collecting; a sense allied to that of making fast or close.]

Originally, a fortified city or town; hence, a hill, for hills were selected for places of defense. But in later times, the term *city* was substituted to denote an episcopal town, in which was the see of a bishop, and that of *borough* was retained for the rest. *At present*, the name is given appropriately to such towns and villages as send representatives or burgesses to parliament. Some boroughs are incorporated, others are not. *Blackstone. Encyc.*

In *Connecticut*, this word, *borough*, is used for a town, or a part of a town, or a village, incorporated with certain privileges, distinct from those of other towns and of cities.

In *Scotland*, a *borough* is a body corporate, consisting of the inhabitants of a certain district, erected by the sovereign, with a certain jurisdiction. Boroughs are erected to be held of the sovereign, as is generally the case of royal boroughs; or of the superior of the lands included, as in the case of boroughs of regality and barony. Royal boroughs are generally erected for the advantage of trade. *Encyc.*

BŌR'ŌUGH, (bur'ro,) *n.* [Sax. *borhoe*, a surety; *borgian*, to borrow; *borg*, interest; *borga*, a debtor, a surety; *borgwed*, a promise or bond for appearance, a pledge; *borg-bryce*, burg-break, violation of pledge; *borghand*, *borhhand*, a surety or bail; *beorgan*, to keep, guard, or preserve; G. and D. *borgen*, to borrow. See the preceding word.]

In *Saxon times*, a main pledge, or association of men, who were sureties or free pledges to the king for the good behavior of each other, and if any offense was committed in their district, they were bound to have the offender forthcoming. The association of ten men was called a *tithing* or *decennary*; the presiding man was called the *tithing-man* or *head-borough*; or, in some places, *borsholder*, *borough's elder.* This society was called, also, *friburg*, freeburg, frank-pledge. Ten tithings formed a *hundred*, consisting of that number of sureties, and this denomination is still given to the districts comprehended in the association. The term seems to have been used both for the society and for each surety. The word *main*, hand, which is attached to this society, or their mutual assurance, indicates that the agreement was ratified by shaking hands.

Spelman. Blackstone. Cowel.

Some writers have suggested that the application of this word to towns sprung from these associations, and of course was posterior to them in time. BOUND, *v. t.* To limit; to terminate; to fix the furthest point of extension, whether of natural or moral objects, as of land, or empire, or of passion, desire, indulgence. Hence, to restrain or confine; as, to *bound* our wishes. *To bound in*, is hardly legitimate.

1. To leap; to jump; to spring; to move forward by leaps.

Before his lord the ready spaniel *bounds*. *Pope.*

2. To rebound; *but the sense is the same.*

BOUND, *pret.* and *pp.* of Bind. As *a participle*, made fast by a band, or by chains or fetters; obliged by moral ties; confined; restrained.

2. As *a participle*, or perhaps more properly *an adjective*, destined; tending; going, or intending to go, with *to* or *for*; as, a ship is *bound to* Cadiz, or *for* Cadiz.

The application of this word, in this use, is taken from the orders given for the government of the voyage, implying obligation, or from tending, stretching. So *destined* implies *being bound*.

Bound is used in composition, as in *ice-bound*, *wind-bound*, when a ship is confined or prevented from sailing by ice or by contrary winds.

BOUND'A-RY, *n.*† A limit; a bound. *Johnson.*

This word is thus used as synonymous with *bound*. But the real sense is, a visible mark designating a limit. *Bound* is the limit itself, or furthest point of extension, and may be an imaginary line; but *boundary* is the thing which ascertains the limit; *terminus*, not *finis*. Thus, by a statute of Connecticut, it is enacted, That the inhabitants of every town shall procure its *bounds* to be set out by such marks and *boundaries* as may be a plain direction for the future; which marks and *boundaries* shall be a great heap of stones or a ditch of six feet long, &c. This distinction is observed also in the statute of Massachusetts. But the two words are, in ordinary use, confounded.

1. Liberality in bestowing gifts and favors; generosity; munificence. The word includes the gift or favor, and the kindness of disposition with which it is bestowed; or a favor bestowed with a benevolent disposition. This distinguishes it from a mere gift. It is also observed by Johnson, that it differs from *charity*, as a *present* from an *alms*, in not being bestowed upon persons absolutely necessitous. This is often the case; but *bounty* includes *charity*, as the genus comprehends the species; *charity*, however, does not necessarily include *bounty*, for *charity*, or an *alms*, may be given with reluctance.

The word may be used also for a free gift; 2 Cor. ix. 5; or a disposition to give, without the gift; goodness in general. *Spenser.*

Syr. and Eth. ברך, to shine, or more probably, Eth. ⵏⵀⵍ *bareah,* to shine, as the Eth. participle ⵏⵀⵍⵢ *berht* or *bereht,* corresponds exactly with the Saxon. I have not found this word in any other Teutonic or Gothic language, and the original verb is lost in the Saxon. In Saxon, *beorhthwile* or *brihthwile* signifies a moment, the twinkling of an eye. This directs us to the primary sense of the verb, to shine, which is, to shoot, to dart, to glance. The contents are 2150.42 solid inches, equivalent to 1131 ounces and 14 penny-weights troy. In 1826, the imperial bushel was introduced into England, containing 2218.192 cubic inches; so that 33 of the old or Winchester bushels are very nearly equal to 32 imperial bushels. *Brande.*

The Winchester bushel is used still in the United States.

BUT, *part.* for *butan.*† [Sax. *butan, buton, buta, bute*, without, on the outside, abroad: hence, except, or excepting, besides; that is, separated, not included. The verb is not in the Saxon; but in Dutch we have

the verb in its primary sense, *buiten*, to rove or wander, to go freebooting; *buit*, booty; *buiten*, out, without, abroad, besides, except; *buiten boord*, overboard; *buiten man*, an out-man, a stranger; G. *beute*, booty; Sw. *byte*, booty; *byta*, to exchange; Dan. *bytte*, booty, a parting, division, distribution; *bytte*, to part, divide, exchange, barter; Sp. *botin*; It. *bottino*; Fr. *butin*, booty. The primary sense of *booty* is to rove or wander, to part or separate from; applied to persons, it is to wander; applied to things, it may include stripping. *But*, then, is a contraction of *butan*, and primarily a participle.]

†1. Except; besides; unless.

Who can it be, *but* perjured Lycon? *Smith.*

That is, removed, separated, excepted. Lycon being separated, or excepted, who can it be?

And, *but* infirmity,
Which waits upon worn times, hath something seized
His wished ability, he had himself
The lands and waters measured. *Shak.*

That is, except, unless, separate this fact, that infirmity had seized his ability, he had measured the lands and waters.

In this use, *but*, *butan*, is a participle, equivalent to *excepting*, and may be referred to the person speaking, or, more naturally, it is equivalent to *excepted*, and with the following words, or clause, forming the case absolute.

Who can it be, Lycon being excepted?
And, *but* my noble Moor is true of mind, it were enough to put him to ill thinking. *Shak.*
It can not be *but* Nature hath some director, of infinite power, to guide her in all her ways. *Hooker.*
There is no question *but* the king of Spain will reform most of the abuses. *Addison.*
It is not impossible *but* I may alter the complexion of my play. *Dryden.*

In the last three examples, *that* is omitted after *but*.

It is not impossible *but that* I may alter the complexion of my play.

In these and all similar phrases, *but* denotes separation, exception.

2. Only; as, there is *but* one man present.

A formidable man *but* to his friends. *Dryden.*

This use of *but* is a modern innovation, but perhaps too firmly established to be corrected. In all such phrases, a negative, *not*, *nothing*, or other word, is omitted. He is *not* a formidable man, *but* to his enemies; that is, *except*. There is *not but* one man present; that is, there is *not except* or *besides* one present. So, also, "Our light affliction is *but* for a moment." 2 Cor. iv. Our affliction is *not*, *except* for a moment.

If they kill us, we shall *but* die. — 2 Kings vii.

The common people in America retain the original and correct phrase, usually employing a negative. They do not say, I have *but* one. On the other hand, they say, I have *not but* one; that is, I have not except one; except one, and I have none. This word *but*, for *butan*, is not a conjunction, nor has it the least affinity to that part of speech.

BUT, *conj.* [Sax. *bote*, reparation, satisfaction, compensation; and adverbially, moreover, further, that is, something added to make good, to supply that which is wanted, from *betan*, to make *better*, or more, to amend, that is, to advance; D. *boete*; Sw. *böte*; Dan. *baade*; W. *buz*, advantage. So, in Ger. *aber*, but, is the Eng. *over*. In some of these languages, it denotes a fine or penance, that which makes satisfaction. In Danish, profit; *boade*, to gain or profit; W. *buziaw*; Goth. *botyan*, id.; G. *busse*, *bvssen*. We use this word as a noun, in the phrase, He gives a guinea to *boot*, that is, to make good, to satisfy, or by way of addition; and as a verb, in the phrase, What *boots* it? what gain or profit is it? It is radically the same word as *bet* in *better*; and the radical sense is, to advance.]

More; further; noting an addition to supply what is wanting to elucidate or modify the sense of the preceding part of a sentence, or of a discourse, or to continue the discourse, or to exhibit a contrast.

Now abide faith, hope, charity, these three; *but* the greatest of these is charity. — 1 Cor. xiii.
When pride cometh, then cometh shame; *but* with the lowly is wisdom. — Prov. xi.
Our wants are many and grievous, *but* quite of another kind.
The house of representatives were well agreed in passing the bill; *but* the senate dissented.

This word is, in fact, a noun, equivalent to addition or supply; but, in grammatical construction, no inconvenience results from considering it to be a connective.

BUT, *n.* [Fr. *bout*, end, extremity, and *but*, end, aim, design; Arm. *but* or *baut*. It is sometimes written *butt*, especially when applied to the end of a plank. It coincides, in sense and elements, with L. *peto*, Sp. *bote*, a thrust, *botar*, to cast, It. *botta*, *botto*, *bottare*, Fr. *botte*, *bouder*, Eng. *pout*, and many other words. See BUTT.]

BY, *prep.* [Sax. *be* or *big*; Goth. *bi*; Sw. and Dan. *be*: D. *by*; G. *bei*; all contracted from *big*. This word, in composition, is often written *be*, as in *because*, *besiege*. In Sw. and Dan. it is used only in composition. The Sw. and Dan. *paa*, and Russ. *po*, may be from a different root, although they are nearly allied in signification, and may be the same word differently written. This preposition occurs as a prefix in all the Shemitic languages, contracted, indeed, into ב. (See the Introduction.) The primary sense is, *pressing*, *close*, *near*, *at*; but in Goth. and Sax. it signifies, also, *about*, *according to*, *on*, *with*, *against*, *after*, &c. In some of these senses, it coincides with the Russ. *po*. The original verb to which this word belongs, most probably signifies to pass, to go, or come, to drive, to press.]

1. Near; close; as, sit *by* me; that house stands *by* a river. So in It. *presso*, from L. *pressus*; Fr. *près*, *auprès*. Hence, *by* was formerly used for *against*; as, in our translation of the Bible, "though I know nothing *by* myself, (οὐδὲν ἐμαυτῷ συνοῖδα,) 1 *Cor.* iv. 4. This use of the word continued down to the time of Baxter.

2. Near, in motion; as, to move, go, or pass, *by* a church. But it seems in other phrases, or with a verb in the past time, to signify *past*, gone beyond; as, the procession is gone *by*; the hour is gone *by*; John went *by*. We now use *past* as an equivalent word; the procession is gone *past*. *Gone by*, is in strictness tautology, as now used; but I apprehend *by* signifies primarily *near*.

3. Through, or with, denoting the agent, means, instrument, or cause; as, a city is destroyed *by* fire; profit is made *by* commerce; to take *by* force. This use answers to that of the Latin *per*, through, denoting a passing, acting, agency, or instrumentality.

4. "Day *by* day;" "year *by* year;" "article *by* article." In these phrases, *by* denotes passing from one to another, or each particular separately taken.

5. "*By* the space of seven years." In this phrase, *by* denotes through, passing, or continuing, during.

6. "*By* this time, the sun had risen." The word here seems to denote *at*, *present*, or *come to*.

7. According to; as, this appears *by* his own account; these are good rules to live *by*.

8. On; as, to pass *by* land or water; great battles *by* sea and land. In the latter phrase, *at* or *on* might be substituted for *by*.

9. It is placed before words denoting quantity, measure, or proportion; as, to sell *by* the pound; to work *by* the rod or perch; this line is longer *by* a tenth.

10. It is used to represent the means or instrument of swearing, or affirming; as, to swear *by* heaven, or *by* earth; to affirm *by* all that is sacred.

11. In the phrase, "He has a cask of wine *by* him," *by* denotes nearness or presence.

12. "To sit *by* one's self," is to sit alone, or without company.

13. "To be present *by* attorney." In this phrase, *by* denotes means or instrument; through or in the presence of a substitute.

14. In the phrase, "north *by* west," the sense seems to be, north *passing* to the west, inclining or going westward, or near west.

As an adverb, *by* denotes, also, nearness, or presence; as, there was no person *by* at the time. But some noun is understood. So, in the phrase "to pass or go *by*," there is a noun understood.

By and by, is a phrase denoting nearness in time; in a short time after; presently; soon.

When persecution ariseth, because of the word, *by and by*, he is offended. — Matt. xiii.

By the by, signifies, as we proceed or pass, [Fr. *en passant*,] noting something interposed in the progress of a discourse which is distinct from the main subject. The old phrase, "on the *by*," on the passage, is now obsolete.

To stand by, is to stand near, or to support.

By, in *lullaby*, and in the nursery, a word used in lulling infants to sleep, is evidently allied to words found in many languages, signifying to rest, or be quiet, or to appease; that is, to press, to stop, as the Gr. παυω, L. *paco*. It is used in Russia, as with us — *bayu bai*. This, probably, is the same word as the foregoing.

By, or *bye*, in *by-law*, [Sax. *bilage*,] is probably the Sw. *by*, Dan. *bye*, a village, town, borough, or city, from Sw. *byggia*, Dan. *bygger*, G. *bauen*, D. *bouwen*, to build, Sax. *byan*, to inhabit; that is, a town-law, a municipal law

In the common phrase *good-by*, *by* signifies *passing*, *going*. The phrase signifies, a good going, a prosperous passage, and it is precisely equivalent to *farewell*, [Sax. *faran*, to go, *go well*,] may you have a good going, equivalent to *good speed* in the phrase "to bid one good speed." [Not *God speed*, as is generally read and understood.]

By is used in many compound words, in most of which we observe the sense of nearness, closeness, or a withdrawing or seclusion.

C.

C, the third letter in the English alphabet, and the second articulation or consonant, is a palatal, nearly corresponding in sound with the Greek κ, kappa, and with the Hebrew כ, caph. It bears a middle place, in pronunciation, between the aspirate ח, and the palatal ג. It is a Roman character, borrowed from the Gr. κ, or from the Oriental כ, which was used in languages written from right to left, and when inverted, and the corners rounded, becomes C. In the old Etruscan, it was written Ↄ, with the corners rounded, but not inverted; in Arcadian, C, as now written. That its sound in Latin was the same, or nearly the same, as that of kappa, may be known from the fact that the Greeks, while the Latin was a living language, wrote kappa for the Roman C. Perhaps the same character may be the basis of the Arabic ج

As an abbreviature, C. stands for *Caius*, *Carolus*, *Cæsar*, *condemno*, &c., and CC. for *consulibus*. As a numeral, C. stands for 100; CC. for 200; &c.

In *music*, C after the clef is the mark of common time, in which each measure is a semibreve, corresponding to $\frac{4}{4}$. C is also the name of a note in the scale; the key note major, and the third minor, of the natural scale. *Encyc.*

In English, C has two sounds, or rather it represents two very different articulations of the organs; one close, like K, which occurs before *a*, *o*, and *u*; the other a sibilant, precisely like *s*, which occurs before *e*, *i*, and *y*. The former is distinguished in this vocabulary by Ȼ, which may be called *ke*. In Russ., C is precisely the English *s*, as it was in the old Greek alphabet. C before *k* is mute; as in *brick*, *sick*.

(See Class Bl.) This word seems to include the significations of several biliteral roots. Qu. W. *cafael*, to get or obtain; or *gavaelu*, to hold. The primary sense of the root seems to be, to catch or seize by rushing on, or, in general, to press, to drive; hence the sense of collection, combination, and accusation.]

1. A number of persons united in some close design; usually to promote their private views in church or state by intrigue. A junto. It is sometimes synonymous with *faction*, but a *cabal* usually consists of fewer men than a party, and the word generally implies close union and secret intrigues. CAB'A-LA, *n.* [See the preceding word It is from the sense of reception.] Tradition, or a mysterious kind of science among Jewish rabbins, pretended to have been delivered to the ancient Jews by revelation, and transmitted by oral tradition; serving for the interpretation of the hidden sense of Scripture. This science consists chiefly in understanding the combination of certain letters, words, and numbers, which are alleged to be significant. Every letter, word, number, and accent of the law is supposed to contain a mystery, and the cabalists pretend even to foretell future events by the study of this science. *Encyc. Buck.*

In *New England*, this word is often equivalent to *intend* or *purpose*, that is, to make arrangements, and form a plan; as, a man *calculates* to go a journey. Thus the *differential* and *integral calculus* is a method of calculation in which quantities are supposed to undergo certain variations of value, to facilitate investigations respecting them. The *integral* is the inverse of the *differential* calculus. The object of the latter is to deduce, from given algebraic expressions, certain other expressions, called *differentials*; that of the former is, from given expressions, to find others, of which they are the differentials. The expressions sought in the latter case are called *integrals*, the terms *integral* and *differential* being correlative. The *calculus* of *variations* may be regarded as a department of the differential and integral calculus, in which the investigations are of a peculiarly general and recondite character. *A. D. The characteristics are: it has no horns; it has six fore teeth in the under jaw; the canine teeth are wide set, three in the upper and two in the lower jaw; and there is a fissure in the upper lip. The dromedary, or Arabian camel, has one bunch on the back, four callous protuberances on the fore legs, and two on the hind legs. The Bactrian camel has two bunches on the back. The llama of South America is a smaller animal, with a smooth back, small head, fine black eyes, and very long neck. The pacos, or sheep, of Chili, has no bunch. Camels constitute the riches of an Arabian, without which he could neither subsist, carry on trade, nor travel over sandy deserts. Their milk is his common food. By the camel's power of sustaining abstinence from drink for many days, and of subsisting on a few coarse shrubs, he is peculiarly fitted for the parched and barren lands of Asia and Africa.

CAM'PHOR-TREE, *n.* The tree from which camphor is obtained. According to Miller, there are two sorts of trees that produce camphor; one, a native of Borneo, which produces the best kind; the other, a native of Japan, which resembles the bay-tree, bearing black or purple berries. But the tree grows also in Sumatra. The stem is thick, the bark of a brownish color, and the ramification strong, close, and extended. The wood is soft, easily worked, and useful for domestic purposes. To obtain camphor, the tree is cut down, and divided into pieces, and the camphor taken out; it being found in small, whitish flakes, situated perpendicularly, in irregular veins, in and near the center of the tree. It is then repeatedly soaked and washed in soapy water, to separate from it all extraneous matter. It is then passed through three sieves of different texture, to divide it into three sorts, head, belly, and foot camphor. Camphor-oil is camphor, before the operations of nature have reduced it to a concrete form; and concrete camphor may be reduced to oil by nitric acid. *Asiat. Res.* iv. 1.

Camphor forms, with nitric acid, a liquid compound, (nitrate of camphor.) *Graham.*

Camphor is obtained from the *Camphora officinarum,* (Laurus Camphora, Linn.,) a native of China and Japan, and from the *Dryobalanops aromatica,* a native of Borneo and Sumatra. The camphor from the latter is harder, more brittle, and more highly valued, particularly in the East.

The primary sense is, to strain, to stretch, to urge or thrust with force, which gives the sense of producing, and of holding, containing, which is the primary sense of *knowing,* comprehending; and straining gives the sense of power.
